☐ Verbal

☐ No Paperwork at Time of Packets

THE CITY OF
NOBLESVILLE
EST. 1823

TO: Noblesville Board of Public Works and Safety

FROM: Alison Krupski, City Engineer

SUBJECT: Board to Consider Permission for Early Morning Concrete Pour for Pleasant Street Phase 1

DATE: October 10, 2023

Beaty Construction, the City's Contractor for Pleasant Street Phase 1, is requesting permission to complete early morning concrete pours for the bridge deck over the White River. With the size of the bridge deck and the amount of concrete required (approx. 1,300 cubic yards), it is important that the contractor receive steady concrete deliveries in order to meet required pour rates for the deck. Pouring the bridge deck outside of rush hour will minimize the risk of concrete delivery delays due to traffic congestion. They expect two days of early morning pours lasting up to ten (10) hours each, and they would like to begin pouring as early as 2am. Their goal is to complete their pours the last week in October, but depending on weather and the required preparation work, these two pours could move to the first or second week in November. Once the exact dates are confirmed, the City will notify residents in the area.

I recommend the Board of Public Works approve the request for early morning concrete pours for Pleasant Street Phase 1.
