

WHEN YOU'RE WASHING YOUR CAR IN THE DRIVEWAY,

REMEMBER YOU'RE NOT JUST WASHING YOUR CAR
IN THE DRIVEWAY...

When you wash your car, all the soap, scum, and oily grit runs along the curb, then into the storm drain and directly into our streams, rivers, and lakes. This causes pollution, which harms fish, wildlife, and our environment.

So how do you avoid this whole mess? Easy.

- **Wash your car on grass or gravel** instead of on your driveway or the street.
- **Better yet, take it to a car wash** where the water gets treated and recycled.

Separate Storm Sewer Systems – What goes into storm drains flows directly into the environment, untreated.
