Buildings located within the SFHA (Special Flood Hazard Area) on the adopted FIRM (Flood Insurance Rate Map) are subject to more restrictive regulations. Those regulations include limitations on the improvements that can be made to the structure and could result in additional documentation requirements including the submission of elevation certificates. These areas are subject to the requirements of the FH (Flood Hazard) zoning district, the full text of which is contained within Article 8 of the Unified Development Ordinance. Any questions regarding properties within a SFHA should be directed to our Floodplain Administrator.
