

## **SUBDIVISIONS REQUIRING A PERMIT BOND**

The following list contains subdivisions for which Permit Bonds are required to supplement the lack of maintenance bonds to cover development, building, and site work within the subdivision. Individual Permit Bonds ensure compliance with the City's Unified Development Ordinance and City Standards. Any undeveloped building lot in an existing subdivision may require a Permit Bond if infrastructure is affected and no bonds are presently in place for the subdivision to ensure compliance with City Code. Please contact the City's Engineering Department at (317) 776-6330 with any questions regarding development and bond status for specific subdivision information or any questions.
